The Rutgers Department of Chemistry and Chemical Biology needs your support to meet the research and educational challenges in areas as diverse as health, energy and the environment. A major goal of our educational program is to train research scientists to create new knowledge and to become leaders in industry, academia, and government. Your support is critical to enabling high reward research and developing students to be the leaders of tomorrow. Your gifts will enable our faculty and students to explore the most interesting and challenging questions in the many broad fields touched by chemistry by creating new laboratories, student fellowships, endowments, and supporting ambitious new programs. Come join us! Even the smallest gifts have big impacts. Click here to give to CCB.
